

# CLEARLY THE BEST FOR YOUR FAMILY

When it comes to water, you and your family deserve to drink the highest quality possible to stay healthy, happy, and hydrated. Get the best water possible right in your home with an AquaBella reverse osmosis (R.O.) filtration system.

Your AquaBella R.O. includes a high performance membrane to purify your water at the molecular level, plus multiple carbon filters to keep your water tasting fresh.

Create a tap you can trust with the AquaBella R.O.—third party certified to reduce harmful contaminants like nitrates, arsenic, lead, and more.

## AquaBella

### PROTECT

Reduce contaminants that pose a risk to your health

### SAVE

Stop buying bottled water and other alternative beverages

### ENJOY

Improves flavor of coffee, tea, pasta, rice, soups, and more

## LOVE YOUR WATER WITH AN AQUABELLA R.O. SYSTEM

# THE BEST WATER

## FOR HEALTHIER LIVING

### CERTIFIED FOR SAFETY

- Third-party laboratory tested for the ultimate peace of mind.
- Reliable reduction of lead, cysts, arsenic, nitrates, and more.
- Higher quality than most retail bottled water options.

### TASTES GREAT

- Enjoy crisp, refreshing water with no after taste.
- Coffee and tea brewed with R.O. water is less bitter.
- Soup, pasta, rice, and other boiled foods keep their natural flavor.

### ECO-FRIENDLY

- Smaller carbon footprint than commercially produced bottled water.
- Leads to less plastic waste from bottled water.

## HOW DOES IT WORK?

### REVERSE OSMOSIS SYSTEM

- 1 Water passes through the first cartridge where carbon captures any harsh chemicals that would do damage to the R.O. membrane.
- 2 Next, water is pushed through a membrane material that only allows H<sub>2</sub>O molecules to pass while all other contaminants are rejected and rinsed down the drain.
- 3 The water will travel through one more carbon filter to ensure there are no residual unpleasant taste or odor.
- 4 The freshly filtered water is stored in a holding tank so you always have a supply ready when you need it.
- 5 Before it comes out of the tap, the water passes through one final carbon filter for the best flavor possible.
- 6 Your AquaBella R.O. comes with it's own tap to save the best water for your beverages and food prep, leaving your main faucet available for cleaning and other every day uses.

Tested and certified by NSF International against NSF/ANSI Standard 58 for the reduction of the claims specified on the Performance Data Sheet.
